FEB 2018

Dear Sir/Madam,

It is the first time that IIT Kharagpur is organizing the 2nd edition of INAE Youth Conclave during 23rd-25th March 2018. The conclave endeavors to engage engineering students of various colleges all over India in designing economical solutions to the challenging problems of today's generation.

The competition is segmented into two phases. First one is a pre-conclave that would require students to prepare a complete report on the problem statement chosen by them. It has to be a detailed case study with a well-developed strategy to solve the problem. The competition focuses on:

1. improvements in Indian agriculture through suitable fertilizer selection for specific types of soil.
2. Reorganisation of Indian academic program to make it more job oriented yielding employable engineers.
3. Providing healthcare facilities to everyone.
4. Effective waste management and role of Swachh Bharat Abhiyan.
5. Good storage of agricultural produce to benefit farmers.
6. Effective town planning with proportionate amount of open spaces and buildings.

Next phase is the final round. Shortlisted participants would be given a 4 months duration to incorporate improvements to their solution model. The finals would be organized in the mid of August.

IIT Kharagpur invites your students to participate in this Youth Conclave. We seek to have the suggestions from our future leaders- today's youth. It would be very kind of you if you circulate the details of this mail among your students. We hope to see participation from everyone interested to make this noble endeavor a grand success. Attached with this mail is the poster and the deadline for the initial report submission is 24th February 2018. For more details on the problem statements please visit our organizing team website: www.inae2018.iitkgp.ac.in
